

# EURONEXT BERGAMO RELOCATION

## Euronext Bergamo Relocation

Options is expanding its global footprint and Managed Colocation offering into the new Euronext Aruba IT3 datacentre in Bergamo, Italy. As a key venue offering Equities, Derivatives and Indices markets, as well as Oslo Børs and Euronext Dublin, Options recognises the importance of being able to provide participants with colocation services and access to these markets from both within and outside of the IT3 Bergamo datacentre, whilst also ensuring a seamless migration to the new facility for both existing and new participants.

## OUR EXPERTISE

## Scaleable Access to New Global Content

The Options global backbone is rich in key content from numerous global sources, including, but not limited to; exchanges, liquidity providers and third-party vendors. Access to this global content is available from any of the points of presence (PoPs) across the Options global backbone.

## Cost Effective

By leveraging Options' managed services, Customers are able to utilise high performance technology and trade across global markets, with full resiliency and confidence, all at a cost-effective price point.

## Disaster Recovery (DR)

Whilst Options provides production access to the global markets for our customers, we can also build, deliver and manage a full DR solution.

## ABOUT OPTIONS

Options has provided global customer focused, secure, and innovative on demand IT for over 30 years.

Options focuses on IT, enabling Financial Service providers to focus on business growth by deploying and managing technology strategies, custom tailoring them to your organization's business objectives.
