

Infrastructure That Moves Markets

Purpose-Built Hosting for Capital Market Software

Atlas
Apps

✓ **ISV & SaaS Vendors**

✓ **Buy & Sell-Side Financial Institutions**

✓ **Fintech Infrastructure Startups**

AtlasApps is purpose-built to meet the performance, compliance, and integration needs of financial software vendors, buy/sell-side institutions and fintech platforms. We believe your focus should be on your product - not on managing infrastructure. Let us handle the complexity so you can build, innovate, and scale faster. We deliver a complete, end-to-end application hosting and management platform covering everything from deployment and scaling to security, observability, and compliance. Whether you're building trading systems or analytics engines, we provide the infrastructure, tools, and expertise to run your applications reliably and securely in highly regulated environments.

Why AtlasApps?

AtlasApps lets you focus on what matters most; your software.

Purpose-built for capital markets, our platform delivers low-latency performance, audit-ready compliance, and deep domain expertise in financial systems.

With 60+ global data centers, we make it easy to scale securely and efficiently, wherever your business grows.

White Glove Support

Round-the-clock access to responsive, technically fluent support.

Cloud Agnostic Hosting

High-performance compute across dedicated, shared, and public cloud models.

Security & Compliance

Embedded protection and auditability, with managed security, vulnerability management and reporting.

Application Operations

Application-centric deployment, upgrade and L1-L3 BAU support.

Networking & Market Connectivity

Low latency, transparent operations, and seamless access to venues and data.

Tailored Solutions

Architectural design audits, customized environments and deployment services.

Why We Outperform the Giants

Not all infrastructure providers are created equal. While global firms offer scale, they often lack the agility, specialization, and responsiveness that capital markets demand. AtlasApps is built differently.

What Matters	Atlas Apps	Large System Integrators
 Capital Markets DNA	✓ Deeply specialized in financial systems.	✗ Generalist platforms with minimal capital markets focus.
 Compliance	✓ Turnkey SOC 2, ISO 27001, GDPR environments.	✗ Complex, slow, and often custom-built per client.
 Expert Support	✓ Direct access to market-savvy engineers.	✗ Ticket queues, offshore teams, and rotating consultants.
 Speed & Agility	✓ Nimble MSP, fast deployment, tailored service.	✗ Bureaucratic, slow to adapt, heavy processes.
 Optimized Performance	✓ Built for low-latency, high-throughput apps.	✗ Best-effort across shared infrastructure.
 Deployment Flexibility	✓ Cloud, hybrid, on-prem - no lock-in.	✗ Often rigid or proprietary environments.
