

Atlas Workplace

AtlasWorkplace is designed for hedge funds, private equity, and financial services firms. We understand the pace, transparency, and operational standards institutional clients expect. AtlasWorkplace delivers a full outsourced IT solution that integrates Secure Infrastructure, End-User Support, Cybersecurity, and Cloud Services anchored by a high-engagement service model.

Backed by Options' 30-year legacy, 14 years of SOC compliance, and private-cloud pioneering, AtlasWorkplace leverages our status in the top 1% of Microsoft partners to deliver a scalable, resilient IT platform tailored for institutional finance.

Why AtlasWorkplace?

AtlasWorkplace combines deep financial expertise, transparency, comprehensive reporting, structured reviews, and proactive account management.

With 24/7/365 onsite support in every major financial center and unified global cloud infrastructure, we ensure seamless coverage across time zones.

Security is core, with robust, multi-layered cybersecurity built into every service from day one.

Your IT team, platform, and strategy in one.

Financial Services Expertise

Deep knowledge of compliance, governance, and operational demands from investors and regulators.

Transparent Operations

Comprehensive reporting, structured service reviews, and proactive account management keep firms fully informed.

Global Coverage

24x7x365 support, onsite engineers in all major financial centers, and standardized cloud infrastructure across regions.

Security First

Cybersecurity is layered into every service from the ground up, not bolted on after.

White Glove Service

Dedicated Technical Account Managers, VIP Support Specialists, and onsite engineers deliver personalized, consistent support. Every call is answered directly by an engineer, never diverted through an automated system, ensuring immediate, knowledgeable assistance. Structured engagement plans, regular business reviews, and comprehensive reporting dashboards maintain service quality and transparency.

Office & Desktop

Centralized identity management, Microsoft 365 integration, secure mobile device management, and end-user computing controls are standard. Public and private cloud desktop and application virtualization solutions allow seamless, secure remote working.

Cloud & Server

Private, public, and hybrid cloud environments are designed, deployed, and managed with a focus on scalability, security, and resilience. Full server lifecycle management, disaster recovery planning, backup policies, and infrastructure monitoring are included.

Security & Compliance

Options delivers 24x7 Security Operations Center coverage, SIEM correlation, vulnerability management, and proactive threat detection. Dedicated Account Security Officers are available to assist with risk assessments, regulatory audits, and investor due diligence requirements.

AI Enablement

Hosted AI environments, secure Large Language Model (LLM) access, Copilot integration, and retrieval-augmented generation platforms offered through the Options Horizon portal, ensuring compliance and data protection.

Tailored Solutions

Options provides Virtual CTO and Virtual CISO services, along with professional services for infrastructure modernization, cloud migrations, security programs, and specialized project delivery. We also offer ongoing strategic engagement to support evolving business and technology needs.
