AtlasWorkplace Artifical Intelligence solutions help firms adopt AI safely and effectively, with private and secure deployments of large language models. Whether you need hosted infrastructure for internal use cases or secure configuration of models like OpenAI and CoPilot, we build and support environments that prioritize control and compliance.

Artificial Intelligence

Our Horizon platform provides a streamlined front end to these tools, enabling search, prompt input, and document interaction in a secure quick-to-access solution.

Retrieval-Augmented Generation (RAG) and structured access control mean your team can explore new workflows without putting sensitive data at risk.

Smarter Tooling
Deploy private, compliant AI environments tailored for financial firms' unique needs.

Total Control
Maintain governance and oversight with structured access, permissions, & identity controls.

Seamless Integration
Connect OpenAI, CoPilot, & custom LLMs into existing workflows effortlessly.

Secure Access
Enable teams with Horizon's quick, compliant interface for search, prompts & documents.

Data Protection
Safeguard sensitive information using Retrieval-Augmented Generation & strict access boundaries.

Future Ready
Empower innovation while ensuring compliance, resilience & long-term operational scalability.

Powering the Next Generation of AI for the Capital Markets

Our Iceland datacenter expands our Horizon AI private infrastructure footprint, combining renewable energy with advanced cooling for sustainable performance. This deployment enhances capacity and cost-efficiency for clients requiring compliant, high-intensity AI workloads.

Document Reasoning
A secure LLM to assist analysts in reviewing and deduction based on structured/unstructured documents (filings, prospectuses, performance reports).

> Summarize all risk factors in this IPO prospectus...

> Translate this VBA risk model into Python...

Code Automation & Refactoring
Powerful tooling to assist quants & dev with code refactoring, bug fixing & documentation.

> Show me all tickers with bullish 5-day momentum (over +2 z-score)...

> Extract key client details from this onboarding form and enter them into the CRM...

Natural Language Querying of Proprietary Data
By connecting large datasets - including market data via Options AtlasFeed - natural language queries can be used to return results with ease.

Agentic Automation for Front, Middle & Back-Office
Use LLMs to handle multi-step workflows, with context aware decisions and approvals process.

See Horizon in Action - Request Your Demo Today

Discover how Horizon streamlines secure AI adoption with compliant, easy-to-use tools tailored for financial workflows. Our team is ready to walk you through a personalized demo and show how Managed AI can empower your business with confidence. Connect with us to learn more and start your journey.
