AtlasWorkplace Security Services are designed to ensure your sensitive data, client assets, and trading systems remain secure. By providing 24/7 protection via ArtemisMDR, Options' Managed Detection and Response, robust threat & vulnerability management practices, network security, and governance services, our team ensures your entire digital ecosystem is secure, compliant, and resilient, empowering you to focus on strategic growth without risk.

Security & Compliance

Options' Workplace Security Services deliver end-to-end protection, tailored to meet the unique demands of the financial industry in line with your organization's risk appetite - mitigating risks, detecting threats in real-time, and ensuring regulatory compliance. With our expertise, you can focus on maximizing returns while we handle the security that keeps your business protected, compliant, and efficient.

Artemis MDR & Threat Hunting

24/7 threat monitoring, SIEM-based analytics & SOC expertise to detect, investigate & respond to cybersecurity incidents.

Vulnerability Management

Maintain a resilient security posture via internal & external vulnerability & compliance scanning, prioritised, risk-based, timely patching.

Security Hardening

Industry aligned security hardening baselines for all endpoints, networks & authentication services.

Network Security

Managed firewalls with unified threat management, protecting against intrusions, & safeguard critical infrastructure.

Governance, Risk & Compliance

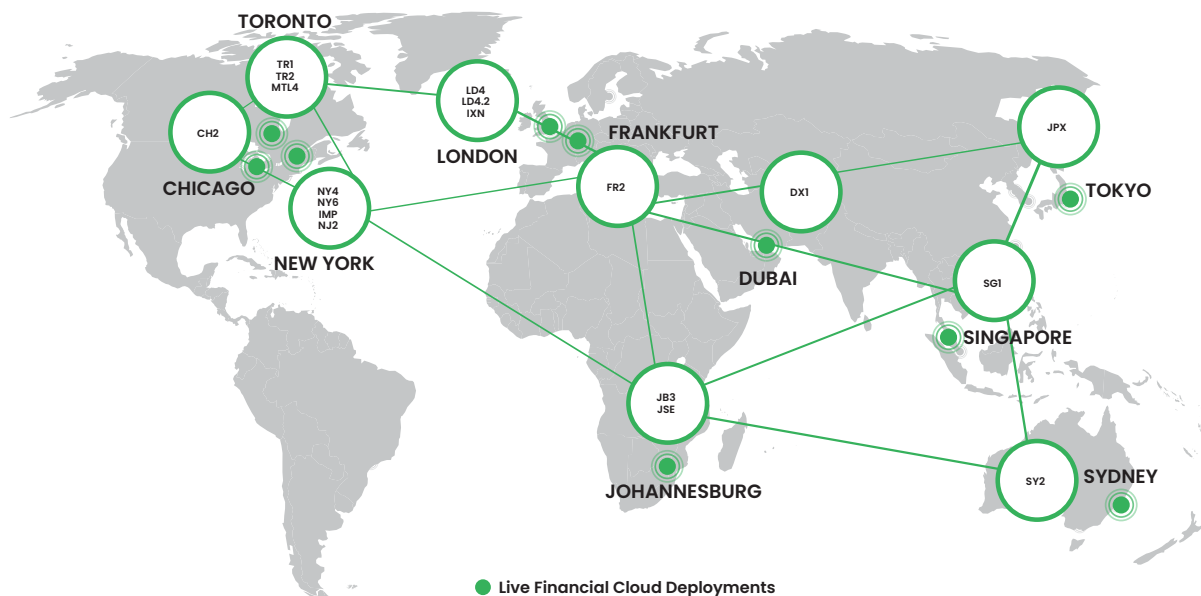

Appointed security officer & policy development to support regulatory adherence, manage third-party risks & ensure audit readiness.

Comprehensive Security Reporting

Detailed reports with insights on threat landscape, vulnerabilities, system health, & overall security posture for informed decision-making.
